Key Subject Areas

- * Understanding the key principles of mindfulness and their application in a clinical psychotherapeutic setting.
- * Develop knowledge of the history and context of mindfulness practice in the mental health setting.
- * Developing simple and effective mindfulness exercises for use in a psychotherapeutic setting.
- * To develop and deliver mindfulness exercises appropriate to the client's needs.
- * Develop knowledge and understanding of the broader applications for mindfulness practice outside of the therapy setting as practical tasks for clients in everyday life.
- * Apply the principles and techniques of mindfulness practice in conjunction with various counselling psychotherapy and coaching approaches.

COURSE TUTOR

Martin is a senior accredited member of the BACP, a life member of the Open University Psychological Society and a senior lecturer in psychotherapy at Nottingham Trent University. He has been a trainer for over 25 years and in clinical private practice as a psychotherapist for over 15 years.

He draws from a range of therapeutic theories and approaches including the third wave CBT model of ACT - Acceptance and Commitment Therapy and Solution Focused Therapy approaches together with use of Clinical Hypnosis and Mindfulness.

Take this opportunity to train with a therapist, trainer and supervisor with a broad range of skills and experience who believes all approaches have their strengths but no one school of thought has all the answers.
